The Legacy Health/Kaiser podiatry residency combines the benefits of a private hospital and managed care institutional training. Podiatry residents rotate with all other residents on clinical experiences and are active members of the ward teams. Didactic training and laboratory workshops supplement the residents' development through a sequential process over a three-year comprehensive training program. High clinic volume and a variety of surgical cases will provide the experience and confidence to practice anywhere in the country as a valuable asset to their respective community.
