CV**AVAILABLE RESOURCES****Sample Contract:** Contact Program **Benefit Package:** Contact Program **Curriculum:** Contact Program**PROGRAM OVERVIEW**

This is one of the premier surgical residency programs in the country with more awards won at the National Post-Graduate Research Forum than any other program. Research is an important part of our program. Many of our faculty are nationally and internationally recognized for their contributions to the field of Podiatry. Many of our faculty are frequently involved in complex cases including nerve decompression, charcot reconstruction, trauma, joint replacement, and external fixation. Members of our faculty extensively lecture throughout the United States and some even worldwide. The base hospital of this program offers a very busy, resident-run clinic with access to a significant amount of complex pathologies where our faculty encourages a profound understanding of both conservative and surgical approaches to these pathologies. This rare, excellent program with the diversity to give residents competence in everything from pediatric care to charcot reconstruction to ankle replacement under the guidance and mentorship of an accomplished and reputable faculty.
