Mt. Sinai Hospital is a registered PMSR-RRA with exceptionally large diversity of surgical exposure at an inner-city level one trauma center. The residents will see foot and ankle trauma rarely seen in the literature. There is a high volume of pediatric cases at this program. Residents get extensive training in ankle, hindfoot and forefoot surgery, reconstruction correction, joint replacement, trauma, arthroscopy, sports medicine, and advanced wound care. Residents work closely with orthopedic attendings on a day to day basis as there is no competing orthopedic surgery residency. Residents follow pre- and post-operative cases and develop proficient clinical & billing skills in both private office and hospital settings. Residents given great responsibility and take ER, night and trauma call. Abundant elective forefoot and rearfoot surgery, far exceeding CPME residency requirements. Didactic exposure include dissection cadaver labs, conferences, case review, and surgical equipment labs. National conferences, and arthroscopic certification are provided.
