The St. Vincent's Medical Center program is fully supported by a state-of-the-art three hospital network, three outpatient surgery centers, an HBO-equipped wound care center, and multiple outpatient clinics providing ample exposure to a wide variety of foot and ankle pathology. Surgical training runs the gamut from inpatient limb salvage to reconstruction with flaps and external fixation. There are no orthopedic residents/fellows to compete with here. Faculty is comprised of physician-educators entirely focused on teaching and optimizing residents outcomes. Residents also have the opportunity to join limb deformity correction mission trips to Central America in tandem with Operation Footprint. This program is most ideal for a self-motivated TEAM player that wants to become a competent and confident foot and ankle surgeon.
