Cambridge, MA 02139**AVAILABLE RESOURCES****Sample Contract:** At CRIP**Benefit Package:** At CRIP**Curriculum:** At CRIP**PROGRAM OVERVIEW**

The CHA Podiatric Medicine and Surgery Residency is a Harvard Medical School affiliated 3 year program approved by the CPME. The residency is authorized for a total of six residents, two in each year of training. The residency is designed with a rotational structure with an emphasis on resource based, competency driven assessment validated training. The resident is provided with a greater responsibility in patient care and decision making as they progress through their training. These experiences coincide with didactic activities such as journal club, skills workshops, case review and lectures. Research opportunities are readily available and a requirement for graduation.

Due to a combination of community-based and referral patients, the medical and surgical volume and diversity is exceptional. The residents are fully integrated into two active outpatient podiatric clinics which allow for resident involvement throughout a patients' medical or surgical management. The residents also scrub and assist in surgery at several local hospitals that are not part of the CHA system.
