PROGRAM OVERVIEW

The Podiatric Residency Program at The Brooklyn Hospital Center consists of PMSR and PMSR-R/RA approved programs, which accepts two residents for the PMSR-RRA and a one PMSR position, effective July 1st 2015 as approved by CPME. The Brooklyn Hospital Center Podiatric Residency Program is a full three year program. At The Brooklyn Hospital Center, residents' practice alongside dedicated podiatric physicians. Our podiatric residency teaching staff and the Program Director are greatly experienced in forefoot and rear foot/ankle surgery, wound care, reconstructive foot surgery, and traumatology.

Experience is gained through time spent in clinical facilities, which are predominantly managed by the residents with support by an attending staff. Time spent in a clinical atmosphere allows residents to work up the surgical patient, decide on the most appropriate procedure, and manage the patient post-operatively.
